

Digital Orthophotography Project

Centralina Council of Governments on behalf of Burke, Catawba, Cleveland, Gaston, Iredell, Lincoln, and Mecklenburg Counties, has contracted with Photo Science Inc., to obtain digital aerial photography throughout all 7 of these counties. As part of this project ESP Associates, P.A. of Charlotte, NC will install ground control panels ("v" shaped targets measuring 1 foot in width and 8 feet in length) within each of these counties to be used to verify horizontal and vertical accuracy of the digital product. The panels will be set beginning on January 20, 2009 and will be removed no later than March 26, 2009. Every effort will be made to place the panels on public property, however, it is recognized that it may be necessary to locate some control points on private property. If you see any of these panels please do not move or remove the panels once they have been set. Thank you for your cooperation.

Questions concerning this project should be directed to the office of:

Robert A. Henderson, Information Technology Director
